## PROFESSIONAL SUMMARY

- Detail-oriented **Data Analyst** with hands-on experience in data cleaning, exploratory data analysis (EDA), and dashboard creation.
- Skilled in **Python, MySQL, Power BI, AI, and Agentic AI** to analyze data and generate actionable insights.
- Experienced in handling large-scale datasets of over **1 million** user records, from preprocessing to visualization.
- Passionate about building AI-powered solutions and delivering data-driven decisions that create impact.

## SKILLS

Python — AI — Agentic AI — MySQL — Power BI — Git

## EXPERIENCE

### Video Editor & Content Analyst

Scholars Mediatec 2025 – 2026

- Edited and optimized educational video content for digital platforms, improving audience engagement.
- Analyzed content performance metrics and viewer behavior to derive insights and enhance content strategy.
- Collaborated with cross-functional teams to streamline workflows and ensure timely content delivery.
- Managed digital assets and supported data-driven decisions for content planning and distribution.

### AI-Powered E-Commerce Shoe Selling Website

Personal Project 2025 – Present

- Designed and developed a modern AI-assisted e-commerce platform for selling shoes with a focus on user experience, responsiveness, and scalability.
- Built core website functionalities including product listings, shopping cart management, product filtering, and responsive UI components.
- Utilized AI tools and intelligent workflows to accelerate development, optimize design implementation, and improve feature integration.
- Implemented clean and structured frontend architecture while ensuring smooth navigation and mobile-friendly performance.
- Worked with Git for version control and project management throughout the development lifecycle.
- Focused on creating a professional digital storefront with optimized layouts, intuitive user interaction, and modern web design principles.

## PROJECTS

### FRIDAY – Personal AI Agent

- Developed an AI-powered personal assistant capable of natural language interaction and task automation.
- Integrated intelligent workflows using Agentic AI concepts to enhance user productivity.
- Implemented modular features including voice interaction, task management, and response generation.

### Poker Simulation

- Built a poker simulation system in Python to model gameplay, odds, and winning probabilities.
- Implemented card logic, probability calculations, and statistical analysis across multiple scenarios.
- Used simulations to derive insights and understand strategic decision-making.

### Data Cleaning of 1M+ User Data & EDA

- Cleaned and preprocessed a dataset of over 1 million user records using Python and MySQL.
- Performed exploratory data analysis to uncover patterns, trends, and data quality issues.
- Created interactive dashboards in Power BI to visualize insights and support decision-making.

## EDUCATION

B.Tech in Computer Science

LNCT University 2023 – 2027 (Pursuing)
